Students in grades 1-9 in the municipal primary and special schools in Växjö municipality 2014

This user survey is a way for the schools and child care administration to follow up a part of the budget's operating objectives for 2014.

The questionnaire is answered anonymously by the student.

The first three questions are background questions and are mandatory to answer. These are followed by six operating questions with four possible answers. Choose and mark the answer that you agree with the most.
