

Interactive meetings with technical experts and specialized civil servants of Växjö Municipality.

A number of technical experts and specialized civil servants in Växjö Municipality will be available to meet with the conference participants for interactive discussions. The expert will give a short verbal introduction which will be followed by a discussion. The meeting will be organized in an open-space format, which means that participants to the workshop can move between different tables and contribute to different discussions.

It will start with an approximate 20-minute presentation about Växjö's work in sustainability and how we reached where we are today. Thereafter we will break up in groups of up to eight persons per group for small thematic presentations and interactive discussions.
